20% off a new 45MG, 38DL PLUS, or MagnaMike 8600 Thickness Gage*

For a limited time receive 20% off the purchase price of a new 45MG, 38DL PLUS, or Magna-Mike 8600® thickness gage when trading in a thickness gage from Olympus (including Panametrics-NDT brand) or other manufacturers.

Upgrade to the latest generation

The **Magna-Mike 8600** is a portable thickness gage that uses a simple magnetic method to make reliable and repeatable measurements on nonferrous materials such as plastic bottles, automotive parts, and aerospace components.

The **45MG** and **38DL PLUS** gages are packed with standard measurement features and software options and are ideally suited for virtually every precision and corrosion thickness gaging application. These versatile ultrasonic thickness gages can measure plastics, metals, composites, rubber, and internally corroded materials.

The 45MG and 38DL PLUS feature many improvements including:

- Enhanced hardware and software
- Support for a broad range of transducers
- Ergonomic design to make the devices easier to hold in one hand
- Improved ruggedness
- Color LED screen
- Improved measurement accuracy

Now is the perfect time to upgrade to the latest in thickness gaging technology.

Contact your local sales representative today.
